The Original Nordic Human Handling Concept

Relocation & Rehabilitation

Turning and Mobilisation

Transfer & Handling

Positioning

Dear Customer

Welcome to our transfer service. We believe a user's functionality is strongly dependent on the choice of aids available. We want to promote natural movement, create a sense of security and make movement and transfers easier in everyday life.

We offer consultancy assistance, testing, solution proposals and training, and are always on hand to help you. Find our consultants' contact information on the back of this brochure.

master care A/S is a 100% Danish-owned company. With our extensive experience in ergonomics and transfer aids, we strive to be a leader in innovation and in the manufacture and launch of simple and unique transfer solutions.

Environmental profile

Respect for the environment and sustainability are our core values and that is why we have created our own environmental profile, which details the initiatives and procedures we follow.

The original concept

In the early 1980s, I developed and distributed the first sliding mats in the Nordic market. Then in the early 1990s, I further developed and launched Europe's first open sliding and turning system, the Master Turner. The products have been further developed ever since, partly to accommodate our environment and sustainability values.

Cooler to lie on

All of our current sliding and turning systems have an extremely light, organic non-woven biomaterial as padding. This ensures unique moisture absorption, anti-allergy properties and that the product is significantly cooler – and thereby comfier – to lie on than other similar products.

The 5 categories

**How
do I choose
the best
solution?**

The 5 categories for choosing aids according to mobility, cognition and weight.

General Users' mobility levels can fluctuate throughout the day and this will affect the relevant category. It is important to assess the user's level of mobility continuously (before, during and after transfer) and to adapt the transfer method, aids and number of helpers accordingly.

The weight categories are indicative. For users who lie heavily on the mattress or have a lot of tonus, it is worth choosing an aid that provides less friction, such as a Master Turner rather than a "Light Turner".

Category 1: Self-reliant user

The user can transfer themselves independently with or without aids.

Following verbal and/or visual instruction, the user can handle the transfer themselves and no further support is required.

Patient group max. 250 kg.

Suitable aids include: Silk Master, Light Cover, Master Turner – S, Travel Master, Master Turner – S or M, Auto Slide, One Way Open, various slide boards, Nylon Master Open and more.

Category 2: User is partially self-reliant

The user can perform the transfer independently with verbal guidance (oral instruction) and, if necessary, with light physical help.

Using the necessary aids, the transfer can be performed without risk of injury. Failure to use the aids could lead to a risk of physical overload for the helper and/or injury to the user.

Patient group max. 250 kg. Requires max. 1 helper.

Suitable aids include: Silk Master, Master Turner – S or M, Glide board, Light Turner, Auto Slide Back, One Way Open and more.

Category 3: User is marginally self-reliant

The user cannot carry out the transfer independently without the use of aids and moderate physical support from the helper.

The user physically contributes to the transfer, which is physically supported by the helper for the transfer to be successful. The transfer may require 1–2 helpers and/or a hoist and other mechanical aids. Cognitive guidance may be required to complete the transfer, but the user has an understanding of the transfer process and collaborates.

Patient group 40–120 kg

Often requires 1–2 helpers and, if necessary, help from other mechanical aids.

Patient group 120–250 kg

Requires at least 2 helpers. The use of hoists and other mechanical aids is recommended. As a rule of thumb, increase the number of helpers by 1 per 50 kg of body weight.

Suitable aids include:

Light Turner and Light Cover for lighter users, Master Turner – M or L, Nylon Master Large, Master Board M or L, Wedges and Cushions.

Suitable aids include:

Light Turner and Light Cover for lighter users, Master Turner – M or L, Nylon Master Large, Master Heavy Leg, Master Board M or L, Wedges and Cushions.

Category 4: User is not self-reliant

The user cannot perform the transfer independently, but can be slightly active during the transfer, depending on physical and cognitive ability. There may be a greater need for cognitive guidance to complete the transfer. The user has an understanding of the transfer process and does not oppose it.

The transfer may require 2 helpers and/or a hoist and other mechanical aids. The transfer requires aids where the helper can involve the user without being physically (or mentally) overloaded.

Patient group 40–120 kg

Often requires 1–2 helpers, and the use of hoists and other mechanical aids is recommended.

Patient group 120-250 kg

Requires at least 2 helpers, and the use of hoists and other mechanical aids is recommended.

Suitable aids include:

Light Turner and Light Cover for lighter users (recommended max 90 kg), Master Turner and Cover, Cushions and Wedges, etc.

Suitable aids include:

Master Turner Pro or XL as well as Cover, Master Board or Master Board Heavy, Nylon Master Large. Wedges and Cushions.

Category 5: The user is not self-reliant, has minimal consciousness or is non-cooperative.

The user cannot physically participate in the transfer and requires maximum support. The user may be terminally ill, or may need to save their energy for e.g. visits, etc.

The transfer may require 2 helpers and/or a hoist, as well as other mechanical aids. The user is unable, or only slightly able, to cooperate in the transfer. The user may be agitated.

Patient group 40–100 kg

Often requires 1–2 helpers as well as a hoist and other mechanical aids.

Patient group 100–250 kg

Requires at least 2 helpers, and the use of a hoist and other mechanical aids is recommended. As a rule of thumb, increase the number of helpers by 1 per 50 kg of body weight.

Suitable aids include:

Light Turner and Light Cover (recommended max. 90 kg). Master Turner L and Cover, Master Board L, Wedges and Cushions.

Suitable aids include:

Master Turner Pro or XL, Master Board Heavy, Nylon Master L, Master Heavy Leg, Wedges and Cushions.

Green Care

master care A/S has over 35 years of experience in producing simple and unique transfer solutions.

High quality and environmental awareness

Our products are known for their durability and high quality. This avoids frequent replacements, which are detrimental to the environment. All of our new Slide and Turn Systems have an organic non-woven biomaterial as padding. This ensures unique moisture absorption, anti-allergy properties and that the product is significantly cooler – and thereby comfier – to lie on than other similar products.

Sustainable transport

master care A/S is constantly working to be a leader in sustainable transfer solutions. This includes purchasing raw materials and keeping production in Europe rather than further afield, thus avoiding long and environmentally harmful transport distances.

Chemicals

By keeping our production within the EU, master care A/S ensures that no substances that are harmful to health and the environment are used in the production of our transfer aids.

Environmentally friendly disposable aids

Slide systems, disposable covers and plastic products are produced in environmentally friendly polyethylene and recycled plastic, which when combusted convert to H₂O and CO₂ if destroyed correctly. Both are natural elements in combustion.

Environmentally friendly packaging

All packaging is processed in accordance with the current requirements for destruction and recycling.

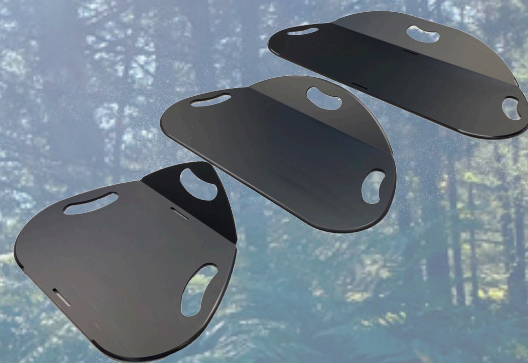

Energy-saving cleaning

The unique thin Bio-padding in the Master Turner models enables faster washing and drying compared to similar products. Thanks to the smaller amount of filling, the turning sheets can easily be washed in a household washing machine instead of having to be transported to a central laundry.

Production with care

All production takes place in Europe under EU law. This means that all production is carried out using legal labour, resulting in a slightly higher cost price – but we think it's worth it.

master care A/S supports the UN's climate goals

New sliding material with even less friction and better durability.

Nylon Master Prima

Nylon Master Prima is a newly developed sliding cloth.

- Double-coated with unique sliding properties
- Minimal fraying
- With ripstop, which increases the strength of the fabric
- Delivered on rolls of 10, 20, 50 or 100 m x W 150 cm, which can be cut to size

The product is available in several sizes, for example:

Item No. MC 001-1023, HMI: 129867

Nylon Master Prima

Size: L 10 m x W 150 cm

Contact customer services on +45 8693 8585 for item numbers for other lengths.

See our new wall mounts on page 7.

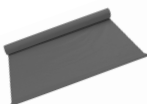

Nylon Master Quiet

Nylon Master Quiet is a newly developed gliding material

- Incredibly quiet, light and soft
- Ideal for dressing and for dementia patients
- OEKO-TEX® Standard 100 certified
- Does not fray
- Available in the following lengths: L 10, 20, 50, 100 m x W 150 cm

The product is available in several sizes, for example:

Item No. MC 001-1026, HMI: 129862

Size: L 10 m x W 150 cm

Contact customer services on +45 8693 8585 for item numbers for other lengths.

New sliding material with even less friction and better durability.

Super Glide ECO Open

Super Glide **ECO** Open is a newly developed slide and transfer plastic

- A perfect alternative to nylon in situations where the material becomes unclean and needs to be washed/discarded
- With unique sliding properties, suitable for most types of transfers
- Made from perforated recyclable plastic
- Can be reused several times for the same person

Available in the following sizes:

Item No. MC 002-1269, HMI: 117518

Super Glide ECO – Open – 1 roll of 100 pcs.

Size: L 100 x W 124 cm (roll width 62 cm)

Item No. MC 002-1272, HMI: 125008

Super Glide ECO – Open – 2 rolls of 50 pcs.

Size: L 100 x W 124 cm (roll width 62 cm)

Multi Rack – Wall Mount

Multi Rack is a newly developed wall mount for slide and transfer plastic on rolls

- Can be mounted horizontally or vertically
- The rack in clear plastic prevents the sliding material from slipping off the roller
- Roll holder with different diameter sizes for misc. tubes
- Solid workmanship and durability
- Can be used for all our lengths of cardboard tubes (60 - 162 cm)
- Can be used for rollers with up to 150 m of sliding cloth

Available in the following size:

Item No. MC 002-1287

Multi Rack – Wall mount

Size: L 70-170 x H 25 x D 32 cm

Master Glide Flexi

- Our highly popular flexible glide boards for seated transfers
- Made from environmentally friendly recyclable material
- With an exceptionally smooth surface that moulds itself to the user
- Can be folded upwards at the rear edge for extra stability, and shields the wheels of the wheelchair
- Extremely flexible with a non-slip coating on the underside
- Features 3 ergonomic handles
- Max. user weight 160 kg

Available in the following sizes:
Product no.: MC 001-7000, HMI: 34160
Master Glide Flexi – S
Size: L 40 x W 35 cm/Thickness: 5 mm

Product no.: MC 001-7010, HMI: 33246
Master Glide Flexi – M
Size: L 60 x W 35 cm/Thickness: 5 mm

Product no.: MC 001-7020, HMI: 33247
Master Glide Flexi – L
Size: L 75 x W 35 cm/Thickness: 5 mm

Unique Slide

Our newly developed tubular and semi-upholstered slide cushion with improved sliding ability for transfer and turning in bed – The turning sheet with a built-in mattress cover

- With additional unique sliding properties
- Slides equally well in all directions
- Cool to lie on
- Padded with a biomaterial that has moisture absorbing properties
- Excellent durability

Available in the following sizes:
Product no.: MC 002-1475, HMI: 125005
Unique Slide – S
Size: L 70 x W 95 cm

Product no.: MC 002-1476, HMI: 125006
Unique Slide – M
Size: L 100 x W 95 cm

Product no.: MC 002-1477, HMI: 125007
Unique Slide – L
Size: L 180 x W 95 cm

Auto Slide Air

The original upholstered Autoslide cushions have been updated and are now even more functional for use in the car

- Supports the back, hips and knees when getting in and out of the car
- The cooling surface has ventilating properties
- Won't fold under the user
- Transfers you in an ergonomically correct position
- Locks in place in the forward direction while driving

Available in the following sizes:

Item no.: MC 001-9110, HMI: 38950

Auto Slide Back Air (Fitted around the backrest)

Size: L 50 x W 50 cm

Number of handles: 2

Product no.: MC 001-9140, HMI: 128782

Auto Slide Turner Air (Lies loosely on the car seat)

Size: L 50 x W 50 cm

Number of handles: 2

Product no.: MC 001-9120, HMI: 38951

Auto Slide Seat Air (Fitted down around the car seat)

Size: L 50 x W 50 cm

Number of handles: 2

Auto Slide Velour

The coveted Auto Slides with a new and updated velour surface, available in three variants

- Perfect for people with lower back, back and pelvic pain
- Reduces friction when getting in and out of the car
- The slide facilitates small position changes during the journey
- Locks in place when sliding forward

Available in the following sizes:

Product no.: MC 001-8200, HMI: 124600

Auto Slide Back – Velour (Fitted around the backrest)

Size: L 50 x W 50 cm

Number of handles: 2

Product no.: MC 001-8210, HMI: 124601

Auto Slide Turner – Velour (Lies loosely on the car seat)

Size: L 50 x W 50 cm

Number of handles: 2

Product no.: MC 001-8230, HMI: 124984

Auto Slide Seat – Velour (Fitted down around the car seat)

Size: L 50 x W 50 cm

Number of handles: 2

Sling Vest

The ultra functional, padded and smooth sling cover that makes it easier to place and remove a sling under/behind a user

- The sling is fed in through the Sling Vest, which is placed over the back of the sling
- Prevents friction/burns on bare skin
- Prevents unnecessary lifting during sling attachment/removal
- Ensures the user maintains the correct sitting position, as they do not have to lean forward
- Ensures that the user's clothing is not pulled

Available in the following sizes:

Item no. MC 003-9040, HMI: 48844
Sling Vest – M
Size: L 66 x W 30/50 cm

Item no. MC 003-9041, HMI: 55719
Sling Vest – L
Size: L 72 x W 60 cm

Item no. MC 003-9042, HMI: 82004
Sling Vest – XL
Size: L 97 x W 60 cm

Sling Sock

Indispensable padded slide cover for the sling's leg straps, which make the sling much easier to place/remove under the user's legs due to its smooth outer and inner side

- The Sling Sock can be fitted and the sling's leg strap passed through easily and without any friction
- Prevents friction against bare skin as the leg strap slides inside the cover
- Ensures that the user maintains the correct sitting position, as the legs do not have to be lifted to remove the leg straps
- Prevents unnecessary lifting

Available in the following sizes:

Product no.: MC 003-9030, HMI: 106546
Sling Sock Regular/ Set of 2.
Size: L 50 x W 13 cm

Product no.: MC 003-9031, HMI: 48792

Sling Sock Basic – M /Set of 2.
Size: L 51 x W 17/28 cm

Product no.: MC 003-9034, HMI: 55707

Sling Sock Basic – L/ Set of 2.
Size: L 60/70 x W 22/29 cm

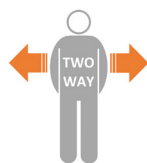

New single-layer sliding cover that prevents pressure sores

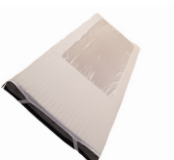

Light Cover

Light Cover is a newly developed silk sliding cover

- Easy to fit without lifting the mattress
- Slides smoothly when moving from side to side and offers excellent durability
- Can be used on an airflow mattress
- Suitable for e.g. dementia patients as it resembles a plain sheet

Available in the following size:

Item No. MC 001-2655, HMI: 125009

Light Cover – M

Size: L 200 x W 85 cm

Slide field: L 140 x W 65 cm

Item No. MC 001-2656, HMI: 125026

Light Cover – L

Size: L 200 x W 85 cm

Slide field: L 200 x W 65 cm

Light Turner

Light Turner is a newly developed silk turning sheet.

- Stitched as a single layer to avoid pressure injuries
- With handles on the sides for manual handling or hoisting
- Slides smoothly in all four directions and offers excellent durability
- The perfect silk turning system for a person with fluctuating levels of mobility
- Can be used on top of the Light Cover

Available in the following sizes:

Item No. MC 002-2701, HMI: 114965

Light Turner – M

Size: L 145 x W 140 cm

Number of handles: 10

Item No. MC 002-2700, HMI: 114964

Light Turner – L

Size: L 200 x W 140 cm

Number of handles: 14

A new slide and turning sheet with unique sliding properties

Master Turner Classic – S

- Ideal for the partially self-reliant person and people with lower back, back or pelvic pain
- Covers the pelvis and lower back
- The specially developed thin padding minimises heat accumulation and absorbs moisture
- Cool to lie on
- Long life
- Also available in an Inco variant
- Can be used in combination with all of our mobile or ceiling hoists

Available in the following sizes:
Item No. MC 001-1712, HMI: 50302
Master Turner Classic – S
Size: L 70 x W 130 cm
Number of handles: 4

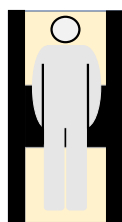

Item No. MC 001-2517, HMI: 53666
Master Turner Classic Inco – S
Size: L 70 x W 130 cm
Number of handles: 4

Vario Cover – S ST E 200x85

A newly developed mattress cover for the Master Turner Classic – S, where the sheet at the foot and head end is integrated in the cover

- Can be placed on top of the mattress and fits easily around the corners without needing to lift the mattress
- Features wings that ensure that the cover sits securely on the centre of the mattress
- Supplied without slide flaps
- Unique sliding properties in all four directions and excellent durability
- 10 cm non-slip edge on both sides
- Can be used for airflow mattresses and for various mattress heights

Available in the following size:
Item No. MC 001-2660, HMI: 126159
Vario Cover – S ST E 200x85
Size: L 200 x W 85 cm
Slide part: L 60 x W 65 cm

No lifting required.
Can be fitted by one person.
Features elastic in the corners.

The mattress does not need to be lifted.

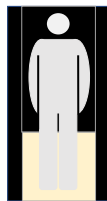

Can be fitted by one person.
Features elastic in the corners.

Vario Cover – M ST E 200x85

A newly developed mattress cover for the Master Turner – M, where the sheet at the foot end is integrated in the cover

- Can be placed on top of the mattress and fits easily around the corners without needing to lift the mattress
- Features wings that ensure that the cover sits securely on the centre of the mattress
- Supplied without slide flaps
- Unique sliding properties in all four directions and excellent durability
- 10 cm non-slip edge on both sides
- Can be used for airflow mattresses and for various mattress heights

Available in the following size:
Item No. MC 001-2670, HMI: 126160
Vario Cover – M ST E 200x85
Size: L 200 x W 85 cm
Slide field: L 140 x W 65 cm

Master Turner Combi – M

Newly developed Medium turning sheet with optimised handles

- Ideal for the marginally self-reliant person
- Covers from head to pelvis and is ideal for people with leg mobility
- The specially developed padding minimises heat accumulation and absorbs moisture. Cool to lie on
- With several handles that can compensate for a low lifting height
- Can be used in combination with all of our mobile or ceiling hoists

Available in the following size:
Item No. MC 001-1725, HMI: 125762
Master Turner Combi – M
Size: L 140 x W 150 cm

Use an incontinence sheet (e.g. Inco Sheet) to extend its life. See page 17

Now with newly developed nylon on the back, which ensures even less friction and better durability.

Master Turner Combi – L

- Developed with a head end at both sides so that it always turns correctly
- Covers the entire body and reduces friction during transfers in bed
- Perfect for people who need full or partial help with transfers
- The specially developed thin padding minimises heat accumulation and absorbs moisture. Cool to lie on
- With several handles that can compensate for a low lifting height, as well as head and shoulder handles at both ends.
- Can be used in combination with all of our mobile or ceiling hoists

Available in the following size:
Item No. MC 001-1780, HMI: 114966
Master Turner Combi – L
Size: L 200 x W 150 cm
Number of handles: 28

Vario Cover – L

Newly developed mattress cover for Master Turner – L and DUO – L

- Can be placed on top of the mattress and fits easily around the corners without needing to lift the mattress
- Features wings that ensure that the cover sits securely on the centre of the mattress
- Comes with 0, 2 or 3 slide flaps
- Unique sliding properties in all four directions and excellent durability
- 10 cm non-slip edge on both sides
- Can be used for airflow mattresses and for various mattress heights

Available in the following sizes:
Product no.: MC 001-2620 HMI: 109946
Vario Cover ST 200x85
Size: L 200 x W 85 cm

Product no.: MC 001-2605 HMI: 124584
Vario Cover 2 200x90
Size: L 200 x W 90 cm

Product no.: MC 001-2607, HMI: 124586
Vario Cover 3 200x85
Size: L 200 x W 85 cm

Please contact our customer services for information about all other variants.

The mattress does not need to be lifted. Comes with elastic or adjustable straps (D-rings) in the corners.

Master Turner Pro – XL

The ideal turning sheet for bariatric patients. It is 50 cm wider and 15 cm longer than the classic Master Turners

- The specially developed thin padding minimises heat accumulation and absorbs moisture. Cool to lie on.
- Covers the entire body and reduces friction during transfers in bed
- Perfect for people who need full or partial help with transfers
- With several handles to compensate for low lifting height or extra wide users, as well as 2 rows of handles at the hip to facilitate knee and hip flexion at turns
- Can be used in combination with all of our mobile or ceiling hoists

Available in the following size:

Product no.: MC 001-1745, HMI: 126448

Master Turner Pro – XL

Size: L 215 x W 200 cm

Number of handles: 24

Use an incontinence sheet (e.g. Inco Sheet) to extend its life. See page 17

Vario Cover – XL and XXL

The newly developed mattress cover that fits the Master Turner Pro – XL and Master Turner DUO – XL

- Can be placed on top of the mattress and fits easily around the corners without needing to lift the mattress
- Features wings that ensure that the cover sits securely on the centre of the mattress
- Supplied without slide flaps
- Unique sliding properties in all four directions and excellent durability
- 10 cm non-slip edge on both sides
- Can be used for airflow mattresses and for various mattress heights

Available in the following sizes:

Product no.: MC 001-2636, HMI: 128019

Vario Cover - XL ST D 200x105

Size: L 200 x W 105 cm

Product no.: MC 001-2637, HMI: 128020

Vario Cover - XXL ST D 215 x 120

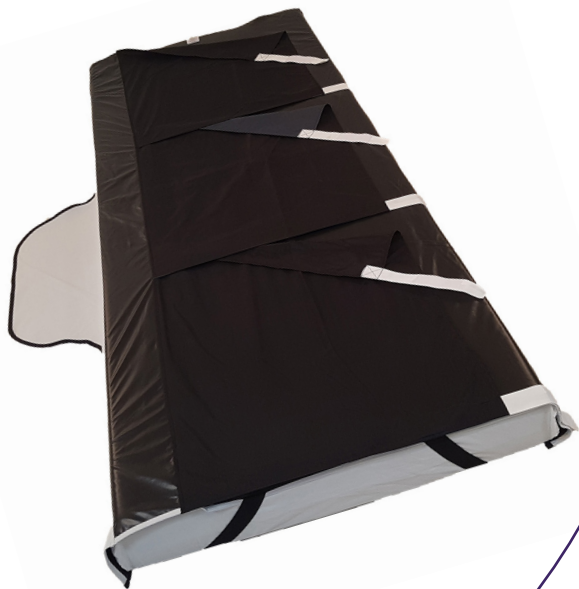

Size: L 215 x W 120 cm

The mattress does not need to be lifted.

Can be fitted by one person. Features elastic or adjustable straps (D-rings) in the corners.

The mattress does not need to be lifted while fitting.
Can be fitted by one person.
Features elastic in the corners.

Re-Cover

- An ergonomic and environmentally friendly tailored mattress cover
- The same high quality you know from the ILF Cover, but fitted like the new Vario Cover
- The better ergonomic and environmentally friendly choice
- Re-Cover has 3 sliding flaps

Available in the following size:
Item No. MC 001-1930, HMI: 126097
Re-cover
Size: L 200 x W 80 cm
Number of sliding flaps: 3

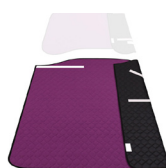

Master Turner DUO – L

- A two-part turning sheet that covers the whole body.
- Ideal for people who must remain on their sides, e.g. for hygiene reasons or for outwardly reacting individuals
- Features handles for better handling
- Can be used with a ceiling hoist
- Offers unique sliding properties
- Long life

Available in the following sizes:
Item No. MC 001-1701, HMI: 49206
Master Turner DUO Top – L
Size: L 100 x W 150 cm
Number of handles: 4

Item No. 001 – 1700, HMI: 49207
Master Turner DUO Bund – L
Size: L 160 x W 150 cm
Number of handles: 6

Product Quality - Care Quality - Quality of Life

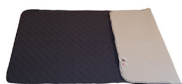

Inco Sheet

- Padded incontinence pad in different sizes
- High absorbency
- Extends the life of the Master Turner
- Excellent durability

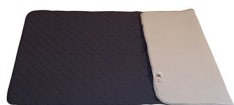

Available in the following sizes:
 Item no. MC 001-1820, HMI: 128704
 Inco Sheet – XS
 Size: L 90 x W 69 cm

Item No. MC 001-1801, HMI: 50803
 Inco Sheet – S
 Size: L 90 x W 140 cm

Item No. MC 001-1811, HMI: 50804
 Inco Sheet – M
 Size: L 120 x BW 140 cm

Super Glide ECO Tube

Super Glide ECO is a newly developed glide and protection plastic

- Can be used as a protective plastic for all our Master Boards
- Can replace nylon covers on transfer boards
- Significantly improves hygiene
- Made from perforated recyclable plastic
- Can be wiped and disinfected
- Contributes to significant resource and time savings.

Available in the following sizes:

Item no.: MC 002-1270, HMI: 122057

Super Glide ECO Tube – M, 1 roll of 100 pcs.

Size: L 110 x W 55 cm

Item no.: MC 002-1268, HMI: 117516

Super Glide ECO Tube – L, 2 rolls of 50 pcs.

Size: L 210 x W 55 cm

For other sizes, please call our customer services

ECO Rack

- ECO Wall Rack is a newly developed wall mount for plastic rollers and transfer boards
- Easy to assemble and use
- Improves hygiene and is easy to clean
- Keeps the aids in order

Available in the following size:

Item no.: MC 002-1286

ECO Wall Rack

Size: L 80 x H 23 x D 17 cm

Master Board

Our ULTRA lightweight and well-known transfer board for horizontal transfers

- Bridges distances of up to 20 cm
- Includes a nylon cover that rotates around the board and significantly reduces friction when moving horizontally
- Available in 2 sizes: for users with leg function and for users who cannot help with the transfer
- Max. user weight 160 kg

Available in the following sizes:

Item no. MC 005-1070, HMI: 34170

Master Board - M 50 incl. 1 x MC 005-1071

Size: L110 x B 50 cm

Number of handles: 6

Item no. MC 005-1210, HMI: 33236

Master Board - L 50 incl. 1 x MC 005-1201

Size: L 180 x B 50 cm

Number of handles: 6

Master Board Multi

The foldable padded transfer board for horizontal transfers between beds

- Can be folded so that it takes up minimal space and can be easily packed away
- Consists of several flexible, braced, padded sheets in a smooth cover with handles
- The smooth cover rotates around the board during transfer, thereby minimising friction.
- The board bridges up to 20 cm gaps between two beds.
- The board's flexibility makes it suitable for beds of varying heights.
- Max. user weight 160 kg

Available in 2 lengths:

Item No. MC 005-1270, HMI 55316

Master Board Multi – M 50, incl. 1 x MC 005-1071

Size L 110 x W 50 cm

Number of handles: 6

Item No. MC 005-1310, HMI 43299

Master Board Multi – L 50, incl. 1 x MC 005-1211

Size: L 180 x W 50 cm

Number of handles: 6

- Fire-retardant core and cover
- Moulds to the body and prevents pressure injuries
- Can be cleaned with rubbing alcohol
- Has a wealth of uses

Available in the following sizes:

Item No. MC 001-8019, HMI: 50150

Positioning Cushion – S

Size: L 70 x W 40 x H 20 cm

Item No. MC 001-8020, HMI: 45939

Positioning Cushion – M

Size: L 70 x W 40 x H 30 cm

Item No. MC 001-8021, HMI: 50151

Positioning Cushion – L

Size: L 70 x W 40 x H 40 cm

Master Comfort Positioning Cushions

Our highly popular Positioning Cushion

- Contains genuine Krøyer balls in a fire-retardant cover
- Moulds perfectly to the body
- Has a wealth of uses
- Lies softly against pressure points

Available in the following sizes:

Item No. MC 001-8015, HMI: 71193

Positioning Cushion – XS

Size: L 50 x W 20 x H 10 cm

Item No. MC 001-8017, HMI: 71683

Arm Cushion

Size: L 70 (89) x W 36 x H 10 cm

Item No. MC 001-8025, HMI: 45942

Cylinder Pad – S

Size: L 30 x Ø 15 cm

Item No. MC 001-8030, HMI: 45943

Cylinder Pad – L

Size: L 100 x Ø 15 cm

Master Comfort Positioning Wedges

Our very popular Back Wedges

- Features a stable foam core
- Features a 5 mm outer surface of viscoelastic foam
- Lies softly against pressure points
- Non-slip underside
- With a fire-retardant cover

Available in the following sizes:

Item No. MC 001-8070, HMI: 28035
Master Comfort Back Wedge – Short
Size: L 30 x D 30 x H 25 cm

Item No. MC 001-8075, HMI: 28036
Master Comfort Back Wedge – Long
Size: L 60 x D 30 x H 25 cm

Master Comfort Positioning Wedges

Our highly popular positioning wedges

- Viscoelastic foam that moulds itself to the body
- Lies softly against pressure points
- Features a fire-retardant cover with non-slip material on the underside
- Offering security for the sensory challenged

Available in the following sizes:

Item No. MC 001-8040, HMI: 36382
Positioning Wedge – XS (Set of 2)
Size: L 40 x W 15 x H 5 cm

Item No. MC 001-8035, HMI: 102744
Positioning Wedge – S
Size: L 30 x W 25 x H 14 cm

Item No. MC 001-8050, HMI: 34331
Positioning Wedge – M
Size: L 43 x W 25 x H 14 cm

Item No. MC 001-8060, HMI: 36383
Positioning Wedge – L
Size: L 60 x W 25 x H 14 cm
